

VISTACOM SECUREVIEW™ 2.0

When it comes to viewing content in a mission critical environment, solutions can be rather costly. Vistacom has created a unique solution that is affordable, reliable, and capable of withstanding the rigorous demands of a Security Operations Center.

Vistacom SecureView 2.0 is a video wall solution that provides organizations with the ability to view multiple types of content into a common operational picture. This flat panel video wall and its processor, combine multiple data feeds into a single system, while creating a more simplified workflow. Vistacom SecureView 2.0 provides a solid foundation from which any Security Operations Center can operate and grow.
